

Deployment Scenarios: GXW series Gateways

FXO Gateways: Convert PSTN to VoIP/SIP

Build a modern VoIP platform for internal communications with PSTN trunks.

FXS Gateways: Connect a Legacy Phone System to a VoIP Provider

Upgrade your legacy phone system and save on service costs by integrating it with SIP trunks.

FXS Gateways: Migrate from a Legacy System to an IP PBX

Deployment Scenarios: HT series ATAs

Businesses: Connect Analog Devices to an IP Network

Extend the life of analog devices by integrating them with your SIP network and extending SIP accounts to them.

Consumers: Turn Your Analog Phone into a VoIP Phone

Save money on your phone bills by purchasing a VoIP service plan. Our ATAs allow you to connect your trusty old analog phone to any VoIP network or service.

Use Your ATA as a Router

Our HT800 series, HT502 and HT503 allow you to use your ATA as both a router and to receive VoIP service.
